

## **Instructions for Playing Jeopardy**

1. Students can play individually or in groups.
2. One student or group picks a category and a point value.
3. The instructor (or whoever is operating the PowerPoint) clicks on the selected box for the question.
4. Students raise their hand to answer. The first to raise his/her hand (or a representative of a group to raise his/her hand) answers. The teacher may want to set a time limit for answering the question.
5. Click the back arrow button on the slide to return to the main board.
6. If the student or team is correct, they are awarded the point value of the question. Keep score on the board. If they answer wrong, that amount is deducted from their score.
7. The team or student answering correctly chooses the next question. If no one answered correctly, then the team or student who asked the question asks again.
8. Continue until all questions have been answered. The team with the most points wins.
